# M-DAC MINI

Portable high resolution DAC and headphone amplifier

audiolab

## Massive in features, miniature in size.

The Audiolab M-DAC mini is a portable high resolution DAC and headphone amplifier. Advanced circuitry within stems from Audiolab's range of award-winning DACs, condensed into a slim, battery operated design you can take with you almost anywhere.

Packed with tech, the M-DAC mini can handle resolutions up to 32bit / 384kHz with DSD file compatibility for supreme audio playback. M-DAC mini is compatible with a plethora of modern devices including Android, iOS, PC, MAC - and with the inclusion of Bluetooth aptX wireless streaming, experiencing Audiolab's energetic sound has never been easier.

It's analogue and digital connections including a high powered 6.3mm headphone jack complete the package of a DAC that is big in features, with a mini exterior.
